

CI-positive

BUY

- CI has been in a steady uptrend since early December 2021. CI's 6% decline on Friday puts CI right at 12-month uptrend support (see zoom chart and the closing chart 3). The weekly chart reveals that the current uptrend results from a critical long-term breakout in 2021.

RRG analysis shows that CI is in the Leading quadrant, but has not moved to an extreme position yet.
