

Five for Friday- Riding The International Wave

This week we use the Finviz screener tool to find large international value-oriented stocks that have been trading well. The impetus for this screen is the recent outperformance of international stocks. Since October 1, 2022, EFA, representing the MSCI EAFE index (large to mid-cap across 21 non-USA developed markets), has risen nearly 20%, almost double the gain of the S&P 500.

Fueling the outperformance is the weakening dollar. The dollar index peaked in late September at 114. It now sits almost 10% lower at 105. If you think the dollar index will continue to trend lower and developed international markets will benefit from the weaker dollar, this screen may provide a few ideas on exploiting such a decline.

Screening Criteria

We considered the following factors when screening:

- Country: Outside of the U.S.A.
- P/E and Forward P/E <10
- Market Cap > \$10 billion
- Trading above its 20/50/200 day moving averages

Ticker	Industry / Country	Market Cap	Forward P/E	P/E
VALE	Materials Brazil	78.5bn	7.30	3.80
SHG	Banks South Korea	14.5bn	4.20	4.40
