- CRM rose above its 2022 and its 12-month downtrend lines in January after falling more than 58% in a little more than a year. The zoom chart reveals that the late January breakout moved CRM above 5-month resistance around the 162 level. The weekly chart shows that the inflection point in December confirms long-term support.

RRG analysis shows that CRM moved out of the Lagging quadrant, into the Improving quadrant and is headed toward the Leading quadrant. Both relative strength and relative momentum are improving. CRM was in the TOP 20 in this week's TPA-RRG report ? see RRG below.
